Detalle | Especificaciones | Aplicaciones

Detalle

The Micro-II Express is an industrial chassis built to enable powerful AE testing capabilities in a compact form factor. Its 4 PCI Express slots allow it to hold up to 32 AE channels, using Physical Acoustics' Express-8 AE boards. It has been designed to operate either as a benchtop system via direct connection to a monitor, keyboard, and mouse, or as a remote system controlled by a notebook computer over its Gigabit Ethernet interface.

The Micro-II Express includes all of the features of a standard PC, including a high-performance CPU and USB connectivity, as well as specialized features such as integrated AE Hit LEDs. The chassis offers convenient portability, weighing in at less than 20 lbs., even when fully loaded with 4 AE boards. Its rugged industrial design helps to ensure reliable operation out in the field.

Especificaciones técnicas

Característica	Valor

Importadora Gyb Limitada
Padre orellana 1476
Santiago CL13101 Chile

Característica	Valor
No se especifican características clave directamente en la descripción. Consulte la hoja de datos para detalles completos.	

Aplicaciones

- Funcionar como sistema de sobremesa mediante conexión directa a un monitor.
- Ofrecer potentes capacidades de prueba de AE en un formato compacto.

Componentes y Accesorios

Características Incluidas

CPU de alto rendimiento

Conectividad USB
