Detalle

The examination bed is generally placed in the consultation room to check the specific condition of the patient. From small clinics to large hospitals, it is suitable for use in various departments of outpatient clinics, and can be used as lying or lying on patients during pre-diagnosis.

Features

1. The bed frame is formed by high-quality rigid welding, and the surface is electrostatically sprayed.
2. The foot cover adopts wear-resistant and non-slip outer foot cover, which can better protect the foot of the bed and the ground.
3. The bed surface is made of artificial leather, and the inner lining is made of 3cm thick sponge, which rebounds quickly.
4. A storage rack is added at the bottom to place items, which is more convenient; only in the version with 30 kg gross weight.

Especificaciones técnicas

Especificación	Sin repisa inferior	Con repisa inferior de almacenaje
Dimensiones del producto (AnxPrxAl)	1800*600*600mm(±10mm)	1800*600*600mm(±10mm)
Capacidad de carga	≤175kg	≤175kg
Dimensiones de embalaje (AnxPrxAl)	1860*660*200mm	1860*660*200mm
Peso bruto	25kg	30kg

Aplicaciones

1. Load the bed must support

Confirm that the bed's load capacity covers the weight of the patients you will attend.

- **Gross Weight:** 25kg
 - **Loading:** ≤175kg
- **Gross Weight:** 30kg
 - **Loading:** ≤175kg

2. Installation space

Compare the product dimensions with the space in the consultation room and plan for passage through doors and corridors.
