Detalle

The Tramex CCIK is an excellent kit for checking moisture in concrete for instant, non-destructive, quantitative moisture content testing of concrete floors and ambient conditions and is the ideal non-destructive test kit for monitoring the most crucial information at the time of application.

The Tramex CMEX5 digital moisture meter allows for non-destructive quantitative testing of concrete using Gravimetric testing as a baseline and comparative testing per ASTM F2659. Non-destructive testing of the top ¾" of the slab is most critical when applying coatings. An infrared surface thermometer gives surface temperature and dew point conditions used in conjunction with the Tramex CMEX5 built-in hygrometer.

The Tramex Concrete Coatings Inspector Kit comes with an extension handle in a heavy-duty Tramex travel case. Bluetooth connectivity to the Tramex Meters App allows for visualization of readings and data reporting to mobile devices, to GeoTag test results, create, save and share photos, reports and charts, as well as see your meter screen on your phone when extending to hard to reach places.

1. Concrete Moisture Encounter X5 - CMEX5.
2. Infrared Thermometer.
3. Free App available for Android and iOS (phone not included).
4. Extension Handle.
