Detalle

The Tramex IQCPK is a compact kit for conducting the Installation Quick Check test, which is the instant, non-destructive, quantitative moisture content testing of concrete floors and ambient dew-point conditions at the time of installation.

Even if pre-installation tests have been performed, checking the %MC and ambient dew-point conditions at the time of installation is crucial to ensure successful installation. The Tramex CMEX5 digital moisture meter allows for non-destructive quantitative testing of concrete moisture content using Gravimetric testing as a baseline. The CMEX5 has a built-in hygrometer providing ambient relative humidity, temperature and dew-point measurements. The Infrared Thermometer provides surface temperature readings for comparison with the dew-point conditions to avoid condensation-related issues at the time of installation and floor failures. The Tramex Meters App allows for data reporting to mobile devices, to GeoTag test results, create, save and share photos, reports and charts. The Tramex Flooring Installation Quick Check Plus Kit comes in a Tramex Easy-travel case.

1. Concrete Moisture Encounter X5 - CMEX5
2. Free App available for Android and iOS (phone not included)
3. Infrared Themometer - IRT2
