Detalle

The Tramex RIK allows for point-of-contact, non-destructive moisture testing in roofing waterproofing systems up to approximately 4 inches in depth with the RWS Roof & Wall Scanner. The kit also allows for non-destructive measurement of moisture conditions in concrete decks and pin readings in wood decks and roofing materials, relative humidity readings, and ambient and dew point conditions using the Tramex CMEX5 digital moisture meter and probes. An infrared surface thermometer gives surface temperature. The Tramex Roofing Inspection Kit comes with an extension handle in a protective heavy-duty carrying case with die-cut foam lining. Bluetooth connectivity to the Tramex Meters App allows for visualization of Tramex CMEX5 readings and data reporting to mobile devices, to GeoTag test results, create, save and share photos, reports and charts, as well as see your CMEX5 meter screen on your phone when extending to hard to reach places.

1. Concrete Moisture Encounter X5 - CMEX5.
2. RWS - Roof and Wall Scanner.
3. App available for Android and iOS (phone not included).
4. Hand held electrode with 7.8" (200mm) insulated pins.
5. 10" (260mm) narrow RH probe.
6. Hole punch.
7. Infrared Thermometer.
8. Extension Handle (for RWS).
