Detalle

The Tramex Water Damage Restoration Tech Kit is a compact kit for non-destructive testing of moisture content and conditions in concrete, wood, drywall, plaster and numerous building materials.

Concrete

The Tramex CME5 concrete moisture meter allows for instant, precise non-destructive quantitative testing of concrete using Gravimetric testing as a baseline and comparative testing per ASTM F2659.

Walls and floors

The Tramex ME5 allows for non-destructive quantitative testing of wood and comparative testing of drywall, plaster, brick, tiles, resilient flooring, laminates and roofing. The ME5 has a dual-depth feature to allow for the elimination of substrate influence on readings.

Moisture mapping

Bluetooth connectivity to the Tramex Meters App allows for visualization of readings, moisture mapping and data reporting to mobile devices, to GeoTag test results, create, save and share photos, reports and charts, as well as see your meter screen on your phone when extending to hard to reach places.

The Tramex Water Damage Restoration Tech Kit comes with an extension handle in a Tramex Easy-travel case.

1. Moisture Encounter 5 - ME5.
2. Concrete Moisture Encounter 5 - CME5.
3. Free App available for Android and iOS (phone not included).
4. Extension Handle.
