Detalle

The Tramex Roof and Wall Scanner is an instant, precise, multi-mode, non-destructive impedance scanner for evaluating moisture conditions in roofing (as per ASTM D7954), EIFS, foam insulation systems & other building envelope applications.

The RWS Multi-mode function allows for depth penetration and sensitivity selection and can help trace leaks and pin-point their source, which makes it a very beneficial moisture detector for walls and roofs.

- Complies with ASTM D7954.
- For non-destructive moisture evaluation of roofs, EIFS, foam insulation systems & other building envelope applications.
- To evaluate the extent of the moisture problem and help trace and pin-point its source.
- Multi-mode functions allowing for depth penetration and sensitivity selection.
- Fast and easy to operate giving instant clear readings.
- "Hold" function facilitates ease of recording readings.
- Lightweight, handheld and battery operated.
- Telescopic handle (for use on roofs).
- Inexpensive to purchase and operate compared to other non-destructive testing methods.
- Professional roofing moisture meter for the water damage industry
