OEM FILTRATION PRODUCTS

Product development is a lengthy process. We know because we've been doing it for decades. You want to work with a team that knows filtration inside and out, and knows product development, so your product can get to market fast. We pride ourselves in being the industry filtration experts. From medical devices, to biotech, to aerospace and automotive applications, we've got you covered.

OUR CORE CAPABILITIES:

- Membrane manufacturing and converting
- Industry knowledge and experience to recommend the ideal membrane for your device assist in your membrane selection and evaluation process
- Customized syringe and capsule filters in small batches up to automated mass production
- Support for clinical trials and regulatory submissions of Class I, II, and III FDA-regulated devices.

Some of our most popular products for OEM devices are listed below.

MEMBRANE ROLL STOCK

- Roll slit widths from 0.5" to 36"
- Wound on a 3" plastic core
- Over 10 polymer membrane types available in roll format
- Hydrophilic, Hydrophobic, and Oleophobic options
- 0.01 to 30.0µm pore size range
- Membranes from 6 to 300µm thick

CUSTOM ENCAPSULATED FILTERS

- Syringe and capsule filters from 4mm disc filters to 10" length capsule filters
- Over 20 connection fittings available to choose from
- Optional prefiltration layers
- Ethylene Oxide or Gamma Irradiation sterilization available

MEMBRANES CUT TO FIT YOUR DEVICE

- Over 18 polymer and inorganic membrane types available
- Available as discs or custom dimensions
- Hydrophilic, Hydrophobic, and Oleophobic options
- 0.01µm to 30.0µm pore size range
- Bulk packaging options for commercial scale production
